PROFESSIONAL SUMMARY

Software developer and graphic designer with real-world experience building web systems and 1+ year of corporate IT support at DHL Ghana. Holds an Advanced Diploma in Software Engineering and a Google IT Support Certification. Currently pursuing a BSc in Computer Science at Accra Technical University. Passionate about building functional, well-designed software — and making it look good too.

PROJECTS

Lunch Ordering System *Python · Flask · HTML/CSS · JavaScript* github.com/AyehPrince/LOS-first

- Web-based lunch ordering platform built for corporate environments — employees order, admins manage menus and track orders.
- Designed and built the full stack: Flask backend, relational database, and responsive frontend UI.

WORK EXPERIENCE

IT Support — National Service Personnel **DHL Ghana** Oct 2024 – Jan 2026

- Provided technical support to 50+ staff across multiple departments in a domain-controlled enterprise environment.
- Managed domain user accounts, access permissions, and Active Directory administration.
- Installed, configured, and maintained Windows OS, Office 365, antivirus, and enterprise applications.
- Configured and maintained network printers, LAN infrastructure, and shared resources.
- Supported remote users via TeamViewer/AnyDesk and handled helpdesk requests with documented resolutions.

Elective IT Tutor (Part-time) During Software Engineering Studies

- Taught IT concepts and supported students in understanding hardware, software, and networking fundamentals.
